Price schemes for seasons and agents

Reservation information auto emailed to customer

Reports auto emailed to management

Scanned passport image storage

Guest history

Housekeeping initiation

Multiple properties in one system

hotel and guest management software

Netstation is a user-friendly, cloud server based business application. Designed to be accessed from a web browser, it could be operated 24/7 from any internet point. This feature provides access to business information from any web browsing device, wherever and whenever.

## BENEFITS

### CLOUD APPLICATION

Enables users to access and update information across physically separate locations through the internet. Netstation could be accessed from the head office, from a remote hotel, from home or on a mobile device (iPad) on the go.

### WORLD CLASS TECHNOLOGY

Netstation is hosted on Amazon Web Services, the best cloud hosting provider in the world and utilises world's leading Oracle database and web technologies.

### COST BENEFIT

Netstation does not require a costly VPN (Virtual Private Network) or an expensive database server infrastructure such as, server hardware, server licenses, database licenses at each property to operate. A device with a web browser connected to the internet is all that is required.

### IMPROVED FINANCIAL SECURITY

Systematic and integrated business process results in controlled and transparent cash flows.

### PAY AS YOU USE

Netstation is offered to users as a 'Pay As You Use' financial scheme where users pay a fixed annual fee with no hidden costs.
